Topic: Old Time Logging

This presentation will take a look into the history of logging in Pennsylvania, particularly in Williamsport, PA which was once the lumber capitol of the world. There will be examples on hand of tools that were used and the history behind them. Old modes of transportation will be highlighted, including construction of log rafts. Many of these hand tools have survived the test of time and are still being used to this day.

Reservations are required by December 1, 2017! Please make reservations online at nthardwoods.org or by contacting the NTHA at nthapa@nthardwoods.org or (570) 265-7753. Please include your company name, phone number, and the names of your guests.
