

TIMBER HARVESTING BMP INSPECTION TEMPLATE

It is a requirement of 25 PA Code §102.4(b)(5)(x) that a maintenance program be conducted to provide for the operation and maintenance of all BMPs to be inspected on a weekly basis and after each stormwater event. The program must provide for completion of a written report documenting each inspection, and all BMP repair, or replacement and maintenance activities. This optional template is being provided as an acceptable standard format for written BMP inspection reports on non-permitted timber harvesting operations. Sites that require an Erosion & Sedimentation Control Permit (25 acres or more of earth disturbance) will need to use a different inspection form. Contact the Department or conservation district if you have any questions or concerns.

Project Site Name: _____ Inspection Date: _____ Time: _____ AM / PM

Inspection Type (check one): Weekly Inspection Post-Stormwater Event Inspection

Operator Name/Company: _____ Phone: _____

Inspector Name/Title: _____ Phone: _____

Municipality(s): _____ County: _____

For all "No" answers, describe any BMP repairs, maintenance or replacement: _____

4. **Site Conditions** **Y** **N** **N/A**

- There are signs of visible erosion and sedimentation from the site.
- Disturbed areas in which disturbance has ceased for more than 4 days have been stabilized.
- Stormwater discharges, if occurring during inspection, do not contain floating solids, foam, scum, sheen, or substances that result in observed deposits or produce an observable change in the color, taste, odor or turbidity of the receiving water.

5. Identify any corrective measures that should be taken on this site.
